365 reasons to ask
for it by name

(The *only* FDA-approved HA filler that
lasts up to 1 year with 1 treatment^{1,*})

 **Juvéderm**® Injectable gel XC

*This includes all JUVÉDERM® injectable gel formulations. Most subjects acquired optimal correction at initial treatment.

A Brief Description of Indications for Use, Contraindications, Warnings, Precautions, and Adverse Events for JUVÉDERM® Injectable Gel

Indication: In the United States, JUVÉDERM® injectable gel (including JUVÉDERM® Ultra, JUVÉDERM® Ultra Plus, JUVÉDERM® Ultra XC, and JUVÉDERM® Ultra Plus XC) is indicated for correction of moderate to severe facial wrinkles and folds (such as nasolabial folds).

Please see additional important safety information inside.

Ask for the *only* FDA-approved HA filler that lasts up to 1 year with 1 treatment^{1,*}

With long-lasting JUVÉDERM® XC, you can treat those parentheses lines on the sides of your nose and mouth for up to 1 year with 1 treatment.^{1,*} No other hyaluronic acid (HA) filler can say that.

Ask for results that are customized for you

Worried about a one-size-fits-all wrinkle treatment? With JUVÉDERM® XC injectable gel, your doctor customizes your treatment for you, and gives you the instant, natural-looking results you want—all in 1 treatment.

Ask for results that are smooth and natural

Some HA fillers have a granular consistency. Only JUVÉDERM® has unique HYLACROSS™ technology, which gives JUVÉDERM® XC its special smooth-gel consistency. You'll get a smooth, natural look and feel that holds up over time—so everyone will notice (but no one will know)!

A Brief Description of Indications for Use, Contraindications, Warnings, Precautions, and Adverse Events for JUVÉDERM® Injectable Gel (continued)

Contraindications: JUVÉDERM® injectable gel should not be used in patients who have severe allergies marked by a history of anaphylaxis or history or presence of multiple severe allergies. JUVÉDERM® should not be used in patients with a history of allergies to Gram-positive bacterial proteins. JUVÉDERM® Ultra XC and JUVÉDERM® Ultra Plus XC should not be used in patients with a history of allergies to lidocaine.

Warnings: JUVÉDERM® injectable gel should not be injected into blood vessels. If there is an active inflammatory process or infection at specific injection sites, treatment should be deferred until the underlying process is controlled.

Please see additional important safety information on front cover and inside.

BEFORE:

"I wanted a soft, smooth look, but it had to look natural."

(Instantly smoothes those parentheses lines around your nose and mouth)

AFTER:

"Pleased? I'm more than pleased— why didn't I do this sooner?"
-Marinda

A Brief Description of Indications for Use, Contraindications, Warnings, Precautions, and Adverse Events for JUVÉDERM® Injectable Gel (continued)

Precautions: The safety of JUVÉDERM® for use during pregnancy, in breastfeeding females, or in patients under 18 years has not been established. The safety and effectiveness of JUVÉDERM® injectable gel for the treatment of

areas other than facial wrinkles and folds (such as lips) have not been established in controlled clinical studies. Patients who are using substances that can prolong bleeding, such as aspirin or ibuprofen, as with any injection, may experience increased bruising or bleeding at injection site. Patients should inform their physician before treatment if they are using these types of substances. As with all skin-injection procedures, there is a risk of infection. JUVÉDERM® should be used with caution in patients on immunosuppressive therapy, or therapy used to decrease the body's immune response, as there may be an increased risk

Individual results may vary.

of infection. The safety of JUVÉDERM® in patients with a history of excessive scarring (eg, hypertrophic scarring and keloid formations) and pigmentation disorders has not been studied. If laser treatment, chemical peel, or any other procedure based on active dermal response is considered after treatment with JUVÉDERM® injectable gel, or if JUVÉDERM® is administered before the skin has healed completely after such a procedure, there is a possible risk of an inflammatory reaction at the treatment site.

Please see additional important safety information on back cover.
